CSR Report

Langia Sustainability Report

Langia runs Remotely

Langia is not only in the front line of technology but also in the front line of sustainability.

We have been working remotely as our normal way of operating since 2014. We have long experience with working remotely and still delivering large and complex SAP Commerce projects successfully.

Our Approach

Technology helps us to connect with clients and colleagues effectively and makes our remote policy possible.

No Daily Commuting

We encourage our employees to work from anywhere with a good internet connection to minimize our carbon footprint of everyday work.

Business Travel at Minimum

The simplest way to cut emissions caused by travel is to avoid it. We have long experience in delivering complex projects remotely.

Travel Green

Our strategy for reducing travel emissions involves both reducing the number of journeys and also looking for less carbon-intensive ways of travelling, if the trip is absolutely necessary.

Unit: kg CO2 /year

Langia Saves 138 824 kg CO2 per year

- We save 52,496 kg of CO2 emission from no daily commuting to the office every year.
- We save 86,328 kg of CO2 emission by minimizing the number of business trips every year.
- In total, Langia saves **138 824 kg of CO2 emission** per year.*

LANGIA
IT Solutions AB

Climate change is the challenge of our generation, and it is the Langia's long-term ambition to lead our industry towards net-zero emissions. We will continue our remote work policy with minimized business trips while delivering 100% high-quality SAP Commerce expertise to our clients.

At Langia we have extensive experience in optimizing projects based on SAP Commerce, removing the bottlenecks, and making the whole solution future-proof. To help we bring a pool of leading SAP Commerce experts, who have experience from major international end customers and projects. In many cases, our consultants also have a background with SAP Commerce itself ensuring a profound platform understanding and excellent quality in our delivery. If you are looking for expertise to ensure your solution can meet your performance needs, please contact us.
